

The Future of Building Management

MeteoViva Climate is forward-thinking, self-learning and easy to integrate with over 7 million operating hours of experience in buildings worldwide. The Smart Data Solution ensures an optimised indoor climate while simultaneously significantly reducing energy costs and carbon emissions.

"With MeteoViva Climate we for the first time get a tool that provides us with important insight into the technical condition of the building. We learn where and how we can still save energy."

Jörg Kalbas,
Technical Asset Management
at Deka Immobilien Investment GmbH

Seeking effective ESG solutions? Look at these numbers.

info@meteoviva.com

24/7 in action

MeteoViva Climate optimises your building 24/7, operates predictively, fully automated and learns along the way.

7 million

Operating hours with blue-chip customers in buildings worldwide.

Zero integration problems

MeteoViva Climate connects to any building automation system and is open for integration via API.

x2

MeteoViva Climate creates a digital twin of your building and incorporates all relevant data to ensure an optimal indoor climate while minimising energy costs and carbon emissions.

"Our partnership with MeteoViva is an important building block in our strategy to improve the efficiency of our buildings, facilities and processes."

Dr Stefan Schulte
Chairman of the Executive Board,
Fraport AG

1 mouse-click access to all information

You are always informed about the status of your buildings and benefit from automated generated data for your ESG-reporting.

"Staff complaints have been reduced by 90%."

Christina Hohn,
Central Building Management,
Generali Deutschland Services GmbH
